Consider following me on Instagram (@**SMACKMAX_**). I try to post all of my prints, renders, and animations to build a portfolio of my projects, often in advance of publishing the models. This way, you can get a sneak peek of what's coming next! https://www.instagram.com/smackmax_/

Here is me hiding an Earring pack behind a storage box that did not quite make the cut. So here i presend Cubely and a Earring pack.

*Part of the Free collection

A while back, I made some last-minute earrings for my girlfriend for a flower-power themed party. I kind of want to publish whatever I want, but these were so low effort I felt I should make some more before I publish them. Unsure why I made sword ones though, maybe it's because I've been playing Elden Ring a bunch. But anyway, I don't like the look of them on my feed. So I hide them behind a generic storage box (put them in there maybe xD?)
