Summary

Like 18650's ? Don't like using a lot of PLA to print a holder for them ? Diet 18650 Holder !

At time of upload, I found that a lot of the current models on Thingiverse / Prntables were “High Fat” as in, You'd get 12 cells for 200g of filament.

That rubs me the wrong way.

These “Diet” holders use less PLA and hold way more cells.
