One of my friends like my design on the name keychain, but he wanted to add a logo. I got to work and started making a design I beleve most of you will be able to use. I will add more Templates in the future if anyone wants something else. Otherwsie have fun and use color.

Print settings is up to you here is some parameters:

Layer height: 0.1 - 0.22

Plastic: Anything from Tpu to PETg

Pause at layer height is what is required to achieve a multi color design. This is shown in my video with Cura.

Downlaod the LogoKeyChain.f3d ffile and edit as you desire.

Leave a comment if you have any problems or questions.
