### Summary

For the Sovol SV08, a simple means to replace the 150 Watt supply with one supporting tool changer loads

I was looking into adding multiple tool heads and found I could add a power supply without modifying the SV08 case by mounting the power supply using the 20X20 rails in the base and making a new wire harness, I did have to modify the bottom aluminum cover with a jig saw. Where the original power supply was I'm adding a controller for the extra tool heads, all of which will have 110 Watt hot-ends.
