As I needed an additional headlight for a tractor, I sat down to design one.

The headlight can be used universally, a hole with a diameter of 2mm is required for mounting. Furthermore, 2x M2x6 screws are needed to attach the housing to the mount. It is suitable for all scales between 1:10 and 1:25.

The headlight can be used either with 5/10mm LEDs or with SMD LEDs. There is also an insert on which the SMD LEDs are glued. The cable feed-through is in the center.
