Outer clip for the Sena headset mount on a motorcycle helmet. works with the SMH5-FM, I am not aware if other models have the same clip.

The rubber from the old clip can be removed and placed within the printed model, The thread inserts can be hammered into the printed clip. I was able to remove the old rubber and inserts from the old (broken) outer clip.

Printed flat with supports for the curved end and the offset friction mount. I would err on the side of caution and print on a high density or multiple walls/floor&ceiling lines.
