This adapter was designed to fit a Smiths "Level 1 Equator" (model number EQ-5000) convective warming unit. <https://jsmedequipment.com/products/smiths-medical-level-1-eq-5000-equator-convective-warming-unit-1>

It will probably fit other warming units with the same size air hose.

It is used to connect the warming unit to a pet warming blanket, similar to these. <https://petprosupplyco.com/products/dre-washable-warming-blankets-pack-of-3>

After hanging the adapter on a kennel, the warming blanket is tied to the adapter on the inside, which holds the adapter in place. Then the hose from the warming unit is connected to the adapter on the outside.

The photo of the white adapter shows the actual model. The photo of the rainbow adapter is of the prototype (I beefed up the hooks a little after seeing how the prototype hung).

## Print Settings

Printer Brand: **Prusa**

Printer: **i3 MK4**

Rafts: **No**

Supports: **No**

Resolution: **0.25**

Infill: **15%**

Filament: **Prusament PETG Signal White**
