I have printed this model on my Ratrig V-Core 3.1 with an 0,4 mm nozzle. I Used the 0,28 mm layer height preset with 5% infill.

The modell is plenty strong with these settings.

The model of the cutter knife used in the picture is "STANLEY® Cutter Interlock" nr. 0-10-095

I include the .step file so you can modify it for your needs.
