Summary

An adaptor to connect an Aerobed pump to a SUP hose

[Sports & Outdoor](#) > [Outdoor Sports](#)

Tags: [standuppaddleboard](#) [airpump](#) [paddleboard](#) [aerobed](#)

A friend wanted to re-purpose an Aerobed pump to inflate his stand up paddleboards. I found these models and remixed them together to connect the pump to the SUP hose. I also added tabs on the Aerobed end to make installation and removal easier.

0.4mm nozzle, 0.2mm layer, PLA, Sovol SV05
