### Summary

A simple CatEye clip for mounting to a handlebar.

A Strada Slim computer will lock in place and allow the user to change the computers mode by pressing the bottom of the computer just like the factory clips. This model is intended to be fastened to the handle bars using two ~1.5x2.5mm zip ties so that it fits any size bar.

My functional print was made on a prusa XL with a 0.6mm nozzle using matterhackers build ABS. Orientation on the print bed is the same as the model imports with support everywhere but in the zip tie channels.
