Introducing our 3D Printable DJI O3 Air Unit Adapter - the perfect accessory for seamlessly integrating your DJI O3 Air Unit with drone frames featuring a 20mm hole pattern. Designed with precision and functionality in mind, this adapter transforms the standard 25.5mm holes of the DJI O3 Air Unit into a 20mm hole pattern, making it compatible with a wider range of drone frames.

This custom-fitted adapter ensures a secure and stable connection for your DJI O3 Air Unit. It provides a 5mm lift from the bottom of the unit, allowing for better airflow and additional clearance, which can be crucial for maintaining optimal performance and cooling during flights.

Installation is straightforward and user-friendly. The adapter is designed to be fastened from the bottom of the drone frame, providing a solid and reliable mount for your air unit. Simply align the adapter with the 25.5mm

mounting points on the DJI O3 Air Unit, and then secure it to your drone frame using the 20mm hole pattern.

Made from durable and lightweight materials, our 3D Printable Adapter is built to withstand the rigors of FPV flying while adding minimal weight to your setup. Its compact and efficient design ensures that it integrates seamlessly with your drone, preserving the aesthetic and aerodynamic profile of your build.

Whether you're upgrading an existing drone or building a new one, our DJI O3 Air Unit Adapter is an essential addition that enhances compatibility and functionality. Enjoy the flexibility of using your DJI O3 Air Unit with a wider range of frames and the added benefits of improved airflow and clearance. Get ready to take your FPV experience to new heights with this versatile and practical adapter.
