This is a modern, stylish, and elegant planter design for housing your plants in style. It is a fairly easy print with no supports required. I also included an alternate, smaller version since scaling down the larger model would reduce the tolerances.

It is fairly easy to assemble this modern planter by gluing the 4 legs into the corresponding slots on the ring. Glue is required for a sturdy build. The cup does not have to be glued as it can sit on the base freely.

This model has somewhat tight tolerances so if you are having trouble fitting the pieces together, you can switch to the smaller version and scale it up.

If you like this model, feel free to check out my other planter designs here:
