Tags: [ubiquiti](#) [unifi](#) [network](#) [serverrack](#) [10inch](#) [networking](#) [networkrack](#) [10inchrack](#) [ucgultra](#) [uxgmax](#) [ucgmax](#)

An unofficial 10-inch rack mount for the Ubiquiti UniFi UCG-Ultra | UCG-Max | UXG-Max.

OBS.: The **UCG-Max** processor reaches 75~ 90 degrees Celsius for normal use, and the bottom can get **REALLY HOT**. So use filaments with higher temperature tolerance if that's your device.

Print Settings

Printer Brand:

Anycubic

Printer:

Custom Mega X

Rafts:

Doesn't Matter.

Supports:

Yes.

Resolution:

0.2 or 0.24

Walls/Perimeters:

At least 3. Better with 4.

Infill:

20% or more.

Filament:

I printed mine in PLA+, but PETG would've been better due to the heat.
