Racing circuits building kit

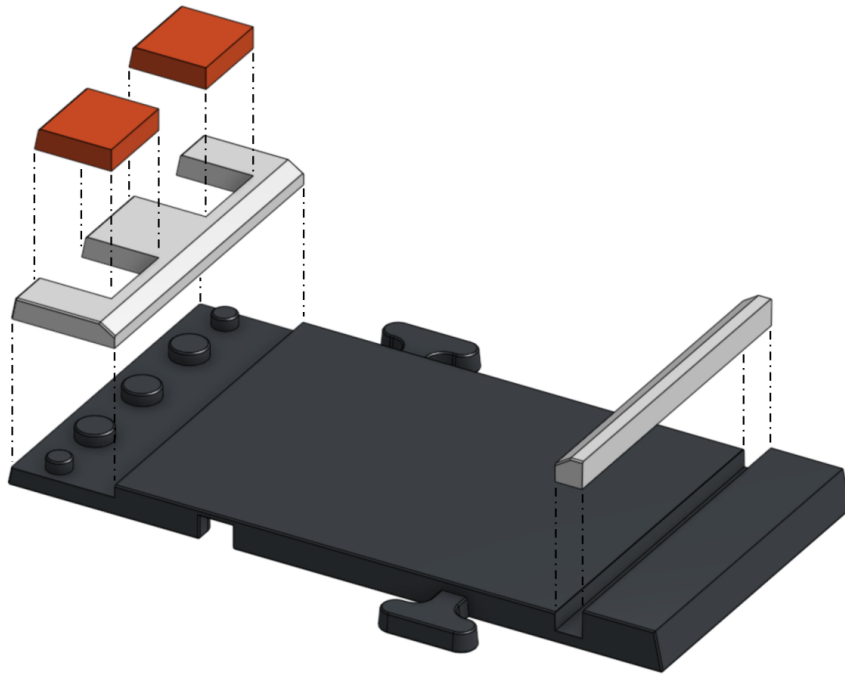

This is a part of a kit of racing circuits for all fans of motor racing, especially Formula 1 fans. Build all the Formula 1 Grand Prix race tracks. There are more than fifty different roads available. The set is in 1/64 scale, perfect for model cars like HotWheels.

Printing instructions

The model comes in two variants COMPLETE and PARTS. The first variant, COMPLETE, is designed for multi-material printing, E.g. **Prusa XL 5-toolhead**. The second variant is intended for printing individual parts and

subsequent assembly, E.g. [Prusa MK4](#).

The recommended material is PLA or PETG. All parts are printable without support.

Compatibility

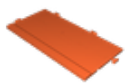

And it will be doubly fun if you try to combine racing circuits with [City Streets](#) and [Extended Set of Wooden Train Track with 50+ Unique Pieces](#)
