Summary

Accurate model of a tire rim for a car

[Hobby & Makers](#) > [Automotive](#)

Tags: [car](#) [tires](#) [tire](#) [rim](#) [carwheel](#) [tirerim](#)

This 3D-printed car tire is a fun and simple design, perfect for DIY projects and display models. Made entirely of plastic with a smooth surface and no treads, it fits standard car rims and can be customized for different sizes. Ideal for hobbyists and automotive enthusiasts, this tire demonstrates the creative possibilities.

Please note, it's not intended for actual road use.
