The next in my line up of fidgets - The Gear Click Fidget

This model consists of 4 parts that **press fit together** - this is built to fit together **without any other tools or parts!**

Parts:

- 2x outer casing - one has a lip
- 1x gear
- 1x spiral spring - Ensure PERFECT bed adhesion - do not blame the print profile
- **Extra STRONG spring included as separate profile - USE AT YOUR OWN FINGERS DOOM!**

This fidget is designed to relive stress and create a wonderful triple click noise as it is spun.

The internal spring is perfectly designed to catch on sequentially - this gives a before, during and after sensation to the fidget motion.

I will be making a smaller version of this, Make sure to use designer profiles - these have been created to ensure that you have the most optimal printing experience.
