Summary

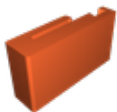

Nebula Camera Stand for Gorilla Shelf

[3D Printers](#) > [Creality Parts & Upgrades](#)

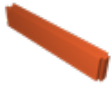

Tags: [cameramount](#) [nebulacamera](#)

I needed a front facing camera mount so I designed a mount that attaches to the underside of the Costco gorilla shelf rail. its slides freely on the rail so it can be positioned where its needed. Its a 3 piece model with dovetail slides. You put the rail connection on frst then slide the stand into place. I printed it with 10% infll and .16 layer height and 3 walls.
