Adapter to convert the loud 2x80mm into a single 92x25mm fan salvaged from HP and Dell PCs.

You can reuse the original 4 screws that held on the 2 fans. The adapter is held on using the top left and bottom right screw holes and the fan uses also the top left and bottom middle.

The screws should cut their own thread into the plastic and if the holes are too tight then you may need to drill them out to fit.
