Summary

Fit your Yetch CoatHinger rod into IKEA PAX 350mm deep wardrobes with this handy bracket.

Simone Giertz's CoatHingers ([link](#)) are the absolute perfect solution for the 350mm shallow IKEA PAX wardrobes ([link](#)), but the brackets it comes with don't quite work since the "back wall" of ikea wardrobes is cardboard-thin.

This bracket fits the PAX system's pre-drilled holes on the sides, and lets you fit all 12 of the the CoatHingers onto its bamboo rod (carefully cut down to 460mm long). I used some 12Gx18mm screws from my local hardware store, but the IKEA bracket screws you can get from them by asking nicely will work too.

Check out the CoatHinger on <https://yetch.store/>

I'm sure you can find IKEA yourself.

Printing tips

You want the piece to be rigid, strong, and not to crack when the screws compress it. I used 6 perimeters and a high density infill to make sure I had extra support. I printed in Prusament natural ASA on my XL.
