This boy model was made by Revopoint POP. I scanned the sculpture with a 3d scanner to generate a PLY file and then disposed it with 3D Model Process—developed by Revopoint. In the end, I get a boy stl file.

If you want to print it with 3D printer, we can print it with a FDM printer.

If we don't want to use support, we can't print it in a big size. The filament we can use PLA and the infill on 20% or more.

I printed it with Creality Ender-3.

If you want to get more models like this, please try to use 3D scanner POP:
