updated 27. 7. 2024 | published 27. 7. 2024

Summary

A remix of half height stackable beer crates that holds LR44 batteries.

[Hobby & Makers](#) > [Organizers](#)

Half height stackable beer crates that holds LR44 batteries. You can add

<https://www.printables.com/model/880654-beach-towel-clip>

to make it stackable.

No special print instructions.

see my other beer crate mods too: <https://www.printables.com/social/113164-antimaterie/collections/403088>

Additional notes

I'm interested in your feedback to improve my stuff! So give me likes, post makes, comment and rate the print to show others and me how well it goes.

If you post a make, let me know which filament you use.

If you want to support me by donating a coffee go to <https://ko-fi.com/antimaterie> I would really happy about it. The money will be invested in all stuff regarding 3d printing to give more and better quality models.

In general my Prints are not for commercial use, but if you are a print farm owner and want to sell some of my stuff, please contact me.

Hope you enjoy my models.

This remix is based on

Half-height beer crate for CR2032 coin cell batteries
by halfbit
