### Summary

Remix of @Dasumocat's MK4 Wyze Camera mount, but with the camera on top of the mount arm.

Tags: [mount](#) [remix](#) [wyze](#) [mk4](#)

Love @Dasumocat's MK4 Wyze Camera mount, but I couldn't see anything above the print bed for the first several layers. I made a small adjustment by flipping the camera mount 180 degrees so the camera sits on top of the mount arm, rather than below it. This way the camera can look down at the print bed.

Printed on its side with grid supports.
