Hey!

Since i made the (Un)original Prusa Heated Drybox from printables, and i really wanted to use it and put it on top offlmy printer box/prusa box.

So i remixed the original feet from the site offlprusa box and made them a bit higher to put my buffer under the box.

They are +/- 155mm height.

Just a quick design i made, nothing special...

thx!

If you add this to your collection and/or download the model, please click the LIKE button and give it some STARS!

Remember, you can earn some Prusameters if you post a pic of your make! Plus, it would make my day to see it. ;-D

Happy Printing!
