Summary

Parametric hair clipper attachments comb. Customize it to make it compatible with your hair clipper

[Household](#) > [Bathroom](#)

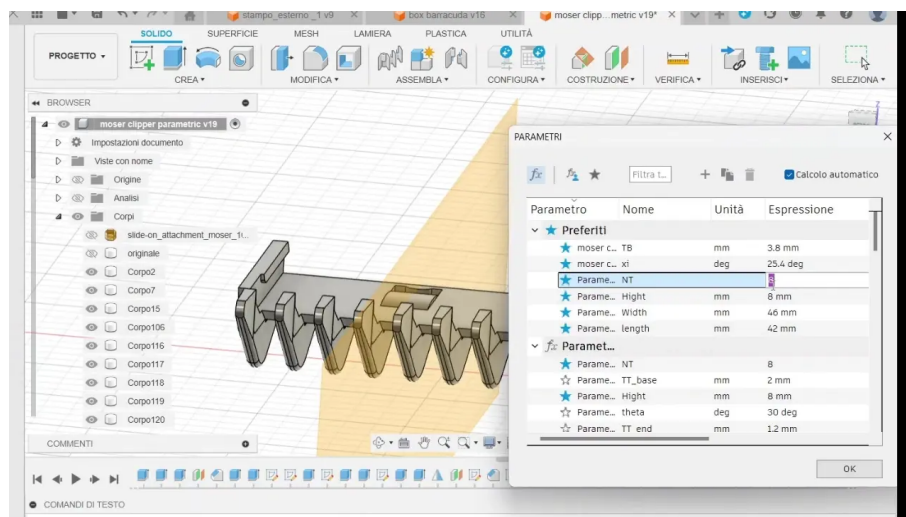

Tags: [hairclipper](#) [moser](#)

Parametric version of the hair clipper attachments. This model allows you to modify the height, width, length, number of teeth, making it compatible with various brands of hair clipper. The measurements indicated in the 3D model are specific to the Moser 1400.

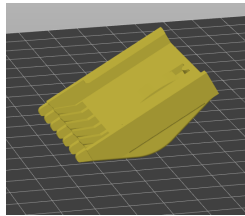

Note

- Do not set the height below 4 mm (if you want to make a “remix”, you could fix it)
- After modifying any parameter, for safety, select Utility → Compute All

Printing Instructions

- Brim: Yes
- Supports: No
- Print with the front part facing the plate, as indicated here

- Clean the piece as shown in the photos below, using sandpaper and a cutter
