Get ready for a revolution in your chess game with our "Collapsible Chess Set"! All the pieces are designed to collapse and fit together seamlessly, making this set perfect for taking anywhere - whether it's the park, the beach, or even the in-laws' house.

Each piece has been carefully crafted to be printed without supports, except for the knight, where I used tree supports to ensure a noble finish worthy of its stature. And don't worry, the chessboard also got a special touch with a modern and easy-to-print design, perfect for those who value both aesthetics and practicality.

But pay attention! To ensure the pieces print correctly and the collapsible system works like a Swiss watch, it's crucial to avoid over-extrusion and make sure your printer bed is well-calibrated. No pieces getting stuck in the middle of a game, right?

So, if you're a chess enthusiast always on the move, this set is the perfect choice for you. Fun, practical, and stylish, it will turn any place into the setting of a grand match.

I hope you enjoy it as much as I loved creating it!
