These are glass holders for the heatbed. I cut my glass to be the same size as the heatbed, so it needed to hold it at the edges.

Not technically a remix as they were made from scratch, but a remix in spirit of a Thingiverse model. I wanted something that was lower profile, so it doesn't go above the glass, and a slotted screw hole, so I didn't have to completely disassemble the heatbed to get them on.

## Print instructions Category: 3D Printer Parts Print Settings

**Rafts:** No

**Supports:** No

**Resolution:** 0.1mm

**Infill:** 40%
