Summary

Beer Cooler Chiller

[Seasonal designs](#) > [Summer](#)

Tags: [beer](#) [cooler](#) [chiller](#)

This is a beer cooler chiller. Fill it with water to the full line and put it in the freezer overnight. Then put it in your beverage cooler with the cans up against it.

I recommend printing this using ASA filament with a 50-65% 3D Honeycomb infill and at least 4 wall loops. I don't believe PLA will hold up after a couple uses.
