I designed this addition to my garden shed organisers to be able to hold my 'T' shape handled tools.

Like the original this is an easy self-supporting print that needs no supports as long as it is orientated as shown in my printer bed pictures.

The design also incorporates the internal strengthening ribs that I have been adding to my recent models.

The strengthening ribs add extra wall loops to the centre of the part to increase the strength of the part.

If you like this design, check out my other models in this collection.
