Summary

My first attempt at an animatronic based on a hand puppet.

Hello fellow animatronic enthusiasts!

I'm excited to share with you my latest project: a 3D model for an animatronic figure based on the adorable hand puppet Schorsch. If you're looking to add some fun and interactive elements to your Halloween maze, Schorschi is the perfect addition to your setup!

You can find the hand puppet here: [Schorsch Hand Puppet](#)

I found Schorsch to be the perfect character for a Halloween project. His friendly and engaging appearance makes him ideal for explaining the maze rules to children at the entrance. Plus, I've always been fascinated by animatronic figures in theme parks, and creating Schorschi has been an incredibly rewarding experience.

What Schorschi Can Do:

- Rotate: Schorschi can turn around, bringing a dynamic range of motion to your display.

- Tilt: He can lean forward and backward, adding to his lifelike appeal.
- Move Mouth: Schorschi's mouth can open and close, perfect for delivering messages and interacting with visitors.
- Wiggle Nose: A delightful feature that adds a touch of whimsy to his personality.

And that's not all! There are more updates and features planned for Schorschi in the future. My initial goal was to create a fully functional figure, and I'm thrilled with how he turned out.

I hope you have as much fun with Schorschi as I did. Whether you're using him for a Halloween project or just for fun, he's sure to bring smiles and joy to everyone who meets him.

Happy animating!
(A video of Schorschi is still to come)
