Summary

Wall mount - For the Motorized Gridfinity Carousel (see link in the description)

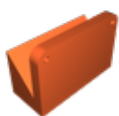

[3D Printers](#) > [Accessories](#)

Made a wall mount bracket for the <https://www.printables.com/model/897707-gridfinity-carousel-motorized>

For my purpose it turned out quite good. Hope others can use it too.

Need 2 to print and ofc 4 screws to add these 2 brackets to the wall (and probably some wall plugs, depending what kind of wall you have).

Model files

carouselwallbracket_v1.3mf

|| Print 2 of these
