I needed some clamp racks and i couldnt find one that used a dowel that i liked so i designed this one works pretty good, the best part about it is you can make it as long or short as you want since by cutting the dowel to whatever length

Edit: this uses a 3/4" wooden dowel

i also created another rack bracket that uses a 5mm smooth rod that i salvaged from an old HP photo printer, this is to hold the small spring clamps that arent big enough for the bigger rack

Print instructions

Unassociated tags: bar clamps

Category: Tool Holders & Boxes Print Settings

Printer: Tronxy X5s

Rafts: No

Supports: No

Resolution: .32

Infill: 50%

Filament: Amazon Basics PLA Black
