## Summary

This is a filament dehydrator mount for the Ender 5.

I needed a better place to print from my filament dehydrator. So, I designed this to mount at the back of the Ender 5 and it provides a convenient place to mount the filament dryer.

It can be adjusted for different widths of filament dryers, but when slid together it fits the sunlu dryer.

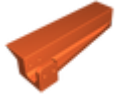

Print in PLA, PETG, ABS, etc. 4+ walls 50% or more infill.

Place flat part on end and it prints without supports. Uses M5 screws to secure to the printer.
