[crtouch](#) [mbot3d](#)

Printed addon for the Ender 3v2 (can be tested for others) to support BlTouch

I downloaded the MBOT3d MK2 shroud but i couldn't make it work with the 3D touch probe so i downloaded a few nothing worked so I had to design my own

It doesn't mess with the printer and it works flawlessly (I had to make room for the X-Axis button)

Probe oġ sets (That i messured, they aren't perfect but work)

X Offset: -46.4

Y Offset: -6

Z Offset: -7.75 (This is not at all perfect, if you can measure it yourself and maybe give feedback thanks)
