updated 5. 8. 2024 | published 5. 8. 2024

### Summary

This plate fits the revised phone holder, see below.

[Household](#) > [Other House Equipment](#)

Tags: [bundesliga](#) [fcstpauli](#) [stpauli](#)

This plate was generated from different svg templates and mainly reworked on CorelDraw!, then exportes as svg and imported in TinkerCad, cut out, joined, finished and exported as individual stl-files, which YOU can drag into your slicer and assign colors to your taste.

I used PLA and printed different plates in PLA on my MK3+MMU2s and MK4+MMU3.

The printed plate fits this model: <https://www.printables.com/de/model/964836-reworked-phone-holder-print-in-place-pip-for-indiv>

Plates from other clubs and themes you could probably find here: <https://www.printables.com/de/@Tritschi>

Good luck for you and FC St. Pauli.
