This is a dead simple mechanism to provide an alternative for tying surgical mask ribbons behind your head. I can't ever get it right, so made these to do the job. Handy for those with dexterity issues. Intended for use with masks that have flat ribbons coming off the corners.

Two versions, one with two slots for each ribbon, one with a diamond opening to snag the ribbons. I prefer the diamond version.

This thing was made with Tinkercad. Edit it online <https://www.tinkercad.com/things/cxiGBKpygNg>
