Tags: [pearl](#) [acaia](#) [fellow](#) [stagg](#)

A single piece printable Stagg EKG stand with room below for the Acaia Pearl scale. There are a few other designs that accomplish a similar outcome, however what I have found is that they either require non-3D printed parts or gluing together multiple pieces to accomplish a clean yet functional aesthetic.

Printed in PLA+ on a highly modified Ender3Pro (geared extruder, Spyder hotend, and E3ProV3 RRF board with Duet Web Control) with the use of tree supports. Total print time took just over 8 hrs and model cleanup was minimal.

Fusion360 file included for remixing purposes.
