I designed this to use as a mounting bracket for the Harbor Freight ammo box that i use as a battery box for my fishing kayak

i used 20mm or 1inch straps will work just fine and printed two of [these](#) at 80%for 20mm or 100% for 1 inch strap buckles and 4 of the strap keepers that go with them to keep it together it works really well so far the battery box snaps into place and the straps are there to keep it from falling out of the kayak

this requires at least a 300mm bed to print in one piece

i uploaded a smaller version that you will need to print two of them which will work the same way it will just be 2 separate pieces

## Print instructions Category: Tool Holders & Boxes Print Settings

**Printer:** Tronxy X5s

**Rafts:** No

**Supports:** No

**Resolution:** .2

**Infill:** 30

**Filament:** eSun PLA Plus Orange
