### Summary

An on-strap powerbank holder for the Pico 4

[Gadgets](#) > [Virtual Reality](#)

Tags: [nano](#) [anker](#) [powerbankholder](#) [powerbank](#) [pico4](#)

A lightweight and fairly stable mount for the Anker Nano powerbank. Bit of a pain to adjust strap size but quite light on your head, and light on filament compared to some other solutions. 5k mAh gives a good enough boost for me.

Print with standard supports for the strap part, none are needed for the actual powerbank holder. Orient as in file. PETG recommended due to being a bit more flexible, as this is a snap-in design.

Ignore the stringing.
