Summary

You can put a can or a glass bottle into this holder and the sand will hold it for you.

[Seasonal designs](#) > [Summer](#)

This can hold your drinks of glass bottles and cans. Just push into the sand a little and the beach will hold it for you.

- No supports or raft.
- Hot glue Holder 2 to the top of Holder 1.
- Hot glue 4 spikeys to the little holes of the Holder 1 so it looks like in the pictures.

Edit: I made the model better so the top is just one part.

Check out the video I made cadding and printing this:
