Looking to add a unique twist to your gaming setup? Check out this one-of-a-kind 3D model: a Deadpool-inspired butt attachment for your controller! Designed with the Merc with a Mouth's irreverent humor in mind, this cheeky accessory is sure to be a conversation starter.

Add some humor and flair to your gaming experience with this Deadpool-inspired butt attachment. It's not just an accessory; it's a statement! print with supports (i used automatic suport of orcaslicer), more smal are the layers more the texture will be visible, don't scale or it will not mount in the controller, the mounting and the as are very precise so that with a bit of force the will be perfectly stady, if u want u can use a bit glue and if ur printer messed up a bit u can Sand the back with sandpaper.
