Summary

Larger nozzle to fill portafilter directly with coffee powder

[Household](#) > [Kitchen](#)

Tags: [nozzle](#) [coffee](#) [machine](#) [portafilter](#) [melitta](#) [molino](#)

I (quickly) created a bigger model, so you can put your portafilter or any small cup directly under it.

(I mean i like the “design”, but my resize work was rly cheap ^^')

To make it work, you need to tape the button on the top (and push the nozzle into the hole).

You will need to move the portafilter a bit around, to spread the powder. Which is the reason why i stopped to tinker around on a full body box for that.

Sorry for the messy picture :D
