Summary

Mount to add the ESP32 camera case to the official Prusa XL Enclosure

Swapped my EnXclosure to the official Prusa XL Enclosure, and needed a new mount for the ESP32 cam. I could not find anything for the **ESP32 camera case**. So I modified the Prusabot mount to work with the camera case.

I used 2 M3x8 screws and nuts. I may have to make some cable management clips for the USB cable if I cannot find any.

This remix is based on

Prusabot ESP32 cameramount for Original Prusa XL enclosure
