[nerfrivalapollo](#)

This foregrip snaps into place in front of the pistol's finger guard, making the Apollo very comfortable to hold and can easily be used to hold the weight of the blaster alone.

This attachment also adds the ability to hold an additional NERF Rival magazine as shown, allowing for faster and more convenient reloading.

The Foregrip is firmly attached with a precision friction fit, allowing for tool-less attachment and removal for easier transportation of the blaster.

#### Printing Recommendations:

- Print orientation; top of grip on bed
- Supports; on build plate only
- Infill; 10% is more than enough
- Walls; 2
