Assembly Guide:

Step one: Attach the two half circles with spikes on them with the big square pin.

Step two: Fit the chain in the long tube with holes in it.

Step three: Connect the small barring (a short cylender with five holes) to the right pin on the chain, you will know it is the right pin if it fits. They are different sizes. And the spike mace top.

Step five: Insert the four smaller square pins into all sides of the short cylender.

Step six: Don't kill anyone. :D

pls

I Have not found a way to easily fix-in-place when retracted. If oyu have any ideas please comment them, or remix it to work 110% instead of 99%
