Makes priming the Apollo quick, easy & comfortable.

The Stock pushes on to the end of the pistol, extending its length by 70mm.

The stock is firmly attached with a friction fit, allowing for removal for easier transport of the blaster.

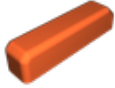

Printing recommendations:

- Print Orentation:
 - Body; vertically with the part that attaches to the blaster facing the print bed.
 - Stock butt; face the 'hollow' end down to the bed.
- Supports: None
- Infil: 10% is plenty
- Perimeters: 2
