Tags: [nerf](#) [stryfe](#) [nerfmod](#) [motorcover](#) [nerfstryfe](#)

This cover is designed to extend the space available for upgraded motors in the blaster.

It attaches with a friction fit however, I recommend using a small amount of adhesive around the outer edges to ensure it doesn't come off during use.

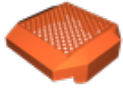

Print recommendations:

- **Print orientation:** outer face of the cover down on the bed.
- **Supports:** None.
- **Infill:** (to small to need it)
- **Perimeters:** 2
