Summary

Small hook to make rubber band bracelets or other creations. The hook is quick to print and perfect for travel.

We keep losing our small hooks that come with rubber band bracelet kits. So if you are in the same boat, here is a quick and easy print.

I recommend using PETG, but PLA should be fine too. I printed mine at 0.1 mm layer height with solid infill using a 0.4 nozzle (0.1 mm DETAIL preset on MK4) - took about 7 minutes.

Note, one side has a small slant, so place the hook with the straight/flat side on the platform.

I hope to see your makes.

Enjoy!
