FMS FCX24 Chevrolet K5 Blazer bottom protector. Works with my [FPV camera mount](#).

Needs 8 small screws to mount (make sure they don't stick from other side because they can scratch steering servo).

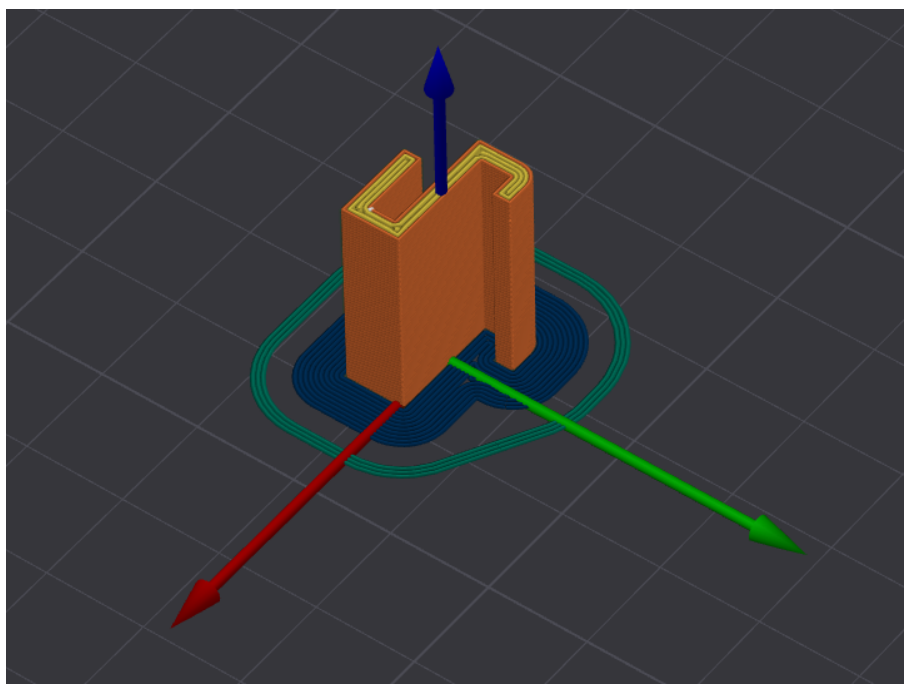

You need to print:

- 1 Left protector
- 1 Right protector
- 2 Center mounts
- 4 side mounts

Left and right protectors printed with supports, I also used mouse ear brim.

Center mounts are printed on side:

**UPDATE 19.08.2024:** uploaded new version - small size adjustments, so the car body clips easier on the back.
