Summary

1U side panel for a 10" mini-PC rack

[Gadgets](#) > [Computers](#)

Tags: [server](#) [serverrack](#) [networkrack](#)

This is a side panel I customized from [Chris_337748's 10in Home Server Project](#). The original side panels were too tall for me to get 4 in, so I shrunk them down to 1U. Two of the originals and 2 of these fit my rack perfectly. In the picture below the original side panels are in white and my new ones are in black.

This remix is based on

10in Home Server Project
