## Summary

An easier reach for the cruise control button

[3D Printers](#) > [Accessories](#)

Tags: [accessories](#) [zero](#) [motorcycle](#)

If you don't want to mess with rewiring the cruise control switch, this lever makes the button on the Zero SR/F less of a reach.

The data is in .3mf for printing, .step so you can modify with CAD, and .f3d so you can see just how out of hand I let the structure get as I experimented with different approaches. :)
